HAWKINSOPS · SOC OPERATIONS · FULL CYCLE COVERAGE

SOC Workflow

COLLECT → DETECT → TRIAGE → INVESTIGATE → RESPOND → IMPROVE

01 COLLECT

VM 130 — **Decoy Telemetry**
HO-HoneyPot-01 generates organic attacker noise. Not canned scripts.

WE-01 LM-01/02 — **Endpoint Telemetry**
Sysmon + Wazuh agents on all machines. Real user behavior as baseline.

VM 101 — **Asset Inventory**
Wazuh syscollector builds baseline. Know what normal looks like.

02 DETECT

VM 101 — **Detection Logic**
75+ custom Wazuh rules + decoders. MITRE-mapped. Every rule tested before ship.

VM 100 — **Validation Runs**
Runner-01 fires attack → HO-EPH → PASS/FAIL result logged.

SIGMA — **Portable Rules**
105 Sigma rules, MITRE ATT&CK aligned, platform-agnostic.

03 TRIAGE

VM 101 — **Alert Queue**
Wazuh dashboard on HO-Wazuh-01. Prioritized by severity. Nothing falls through.

GITHUB — **Ticket / Case**
Every alert creates a GitHub issue. Tracked from fire to closure.

FP NOTES — **Noise Suppression**
FP notes + tuning backlog. Reduce noise systematically, not reactively.

04 INVESTIGATE

VM 101 — **Pivot + Timeline**
Wazuh queries for lateral movement. Full event timeline built per incident.

VM EPH — **Endpoint Artifacts**
The host that fired is preserved. Examine artifacts before destroy.

NOTES — **Conclusion**
TP/FP + root cause + IOCs documented. Feeds directly into rule improvement.

05 RESPOND

PLAYBOOKS — **Runbook / Playbook**
10 IR playbooks. Repeatable response. No improvising under pressure.

VM 101 — **Contain + Eradicate**
Wazuh active response + host isolation. Procedures documented, not ad-hoc.

VM 100 — **Verify Containment**
Runner re-executes post-remediation. Confirms containment actually held.

06 IMPROVE

VM 120 — **Metrics**
Grafana-01: FP rate, pass rate, MTTD. Getting better or lying to yourself?

GITHUB — **Detection Tuning PR**
Rules + playbooks updated via pull request. Every change versioned and tracked.

VM 9000/9001 — **Template Hardening**
Base images updated. New EPH VMs start cleaner. Loop gets tighter each cycle.
